

The BAU DODICI project

The twelfth issue of the assembling magazine “BAU Container of Contemporary Culture” is almost ready, we are waiting for the box and editorial book hot from the presses and we will present the magazine on Sunday June 28th at the GAMC museum in Viareggio.

At the same time, we will inaugurate the exhibition “Leo Ex Machina - Leonardesque intelligences in contemporary art”, a large show taking up seven rooms of the contemporary and modern art museum that will feature all the works of BAU Twelve (many in expanded version) as well as a series of art works related to Leonardo and the theme of “new leonardesque machines”, on loan from the Museo Ideale Leonardo Da Vinci (Vinci) and the Carlo Palli Collection (Prato).

The presentation/opening will be accompanied by a rich program of performances, video projections, readings, etc., and the exhibition will continue until October 11th, with several special events organized throughout the summer.

You can follow the project on the BAU facebook page: <https://www.facebook.com/pages/bau/195890741553?fref=ts>

or on the page of the presentation/opening: <https://www.facebook.com/events/419905851515629/>

Find attached the poster of the exhibition and an image of the magazine as well as the Italian press sheet with more details.
